## TEXTILES

cotton

cotton mix

with a cotton content of at least 70%

natural fibres

the textile (incl. softener) has to withstand an **ironing temperature of 200°C**

## APPLICATION

temperature: 190-200 °C

Preheating is not necessary

time: 6-12 seconds

pressure: 0.5-0.8 kp/cm<sup>2</sup>

3-4 bar (strong pressure)

**Strip off carrier paper while still hot**

## SHELF LIFE

approx. 2 years if kept airtight  
in a dark environment

## REQUIREMENTS

minimum detail strength

positive: 0.3 mm, negative: 0.6 mm  
(feed)

Vector file

or pixel graphics with 600 dpi

minimum quantity

100 pcs.

## CARE

washable up to 60°C

iron inside out

do not chlorinate

do not tumble-dry

do not dry-clean

## CERTIFICATE

tested for harmful substances

Oeko-Tex Standard 100 Class 1

**suitable for babies and toddlers**

TRANSFER PRINTING

# Soft-Transfer

**HARDLY PERCEPTIBLE**

With a soft-transfer **the ink penetrates completely into the fabric** leaving a **hardly perceptible layer of ink** on the fabric. A characteristic feature of this transfer is its **soft, elastic** and **durable surface**. Ideally, it is applied on absorbent, elastic cotton or cotton blend fabric or other natural fibres which are suitable for an **ironing temperature of 200°C**.

**Optimum results** are achieved on **light backgrounds**. On **coloured** or **dark backgrounds** the colours may come out **incorrect**. Only **black soft-transfers** are opaque enough on any background.

## CHARACTERISTICS

**hardly perceptible**

The paint does not stay on the surface, but penetrates into the textile

**low opacity**

only suitable for light backgrounds

**mat**

**suitable for babies and toddlers**

TRANSFER PRINTING

# D3000

**SATIN FINISH & OPAQUE**

The D3000 transfer convinces with an extremely **soft, textile touch** and a **satın finish, a sporty yet elegant look**. Due to its **high opacity** it is perfectly suited for **dark and light textiles**. It can be applied on cotton and mixed fabrics, **gently on the textile**. Another feature is its **high elasticity**.

The D3000-transfer is suitable for **all backgrounds** (light, coloured or dark, cotton and mixed fabrics).

### CHARACTERISTICS

gentle on the textile (from 160 °C)  
soft touch  
high elasticity and opacity  
satın finish  
suitable for babies and toddlers

TRANSFER PRINTING

# Sublistop

**NO DYE SUBLIMATION**

The sublistop-transfer offers a **perfect degree of opacity on all coloured textiles** and meets the highest demands regarding **colour-fastness** and **durability**. In particular with **white transfers** on sportswear made of polyester or with a polyester content the **dye particles of the fabric** may **penetrate** into the transfer during the printing process or after some time. When producing a sublistop transfer, a **silver running blockade** is put in a multi-layer procedure between the glue and the layer of dye, which prevents the dye of the fabric from running into the transfer.

**The main difference between Sublistop and D3000 is the silver running blockade to avoid dye sublimation. This is in particular necessary for fabrics mainly made of polyester polyamide fibres.**

The sublistop-transfer is **not suitable for softshell**.

### CHARACTERISTICS

**gentle on the textile (160 – 170°C)**

**soft touch**

**high degree of opacity**

(no dye-sublimation)

**glossy**

**suitable for babies and toddlers**

# GENERAL Information

## WASHING- AND CARE INSTRUCTIONS

The washing- and care instructions as shown on the label of the printed textile are to be followed. With a printed textile, they may be restricted as follows: Wash **without a bleaching agent**, if possible **inside out**. A transfer-conserving method is covering the transfer with a damp cloth while ironing it or ironing it **inside out**. It is advisable to carry out tests before. Avoid tumble-drying or tumble-dry the textile **inside out** at a low temperature.

## INITIAL PRINTING COSTS

For initial printing costs and the handling of data we charge 17.00 € per colour. For follow-up orders with the same motif these costs will not be charged. The initial printing costs for producing photo-transfers are 5 x 17.00 € if correct data and a backer film are provided. Please note our information regarding data transmission: Screen films cannot be used. With photo-transfers a test print cannot be made.

## LEGAL NOTES

Our application-specific consultation and product tests are carried out to the best of our knowledge, also in terms of the rights of third parties. Our recommendation is **without engagement** and does not exempt us from thoroughly testing the products delivered by us for the intended purposes. The application, use and processing of the products is beyond our control and your sole responsibility. To be on the safe side, **test prints** and **wash tests** should be carried out on the material to be printed on.

## TRANSFERS FOR SELF-APPLICATION

The **minimum quantity** is **100 pcs**. When ironing on transfers delivered by Gustav Daiber GmbH, the enclosed **ironing instructions are to be followed closely**. The result may depend very much on the type and condition of the printing press as well as on the local conditions. Before printing, please **check** if the fabric quality to be printed on is suitable for the transfer. Before starting to print, it is absolutely essential to carry out a **test print** and **to wash the textile to be printed on**. Subsequent complaints cannot be acknowledged.

## GENERAL TERMS AND CONDITIONS

The **general terms and conditions of Gustav Daiber GmbH** are to be applied as well as the **unified terms for textile decoration orders** in the version of 1st July 2012, together with the additional terms, unless they contradict the general terms and conditions. You will find the unabridged version of our general terms and conditions at **[www.daiber.de/de/agb](http://www.daiber.de/de/agb)**

**Flock transfers, reflective transfers, label transfers, sublimation transfers and others on request. Outsizes on request.**

We will be glad to advise you personally if you need more colours or larger quantities. Just contact us at **[service-center@daiber.de](mailto:service-center@daiber.de)** or call us at **+49 7432 7016-800**.
